

HYPERNEX Final Conference: “Boosting the European Hyperloop Ecosystem”

23 February 2022

luisa.mtzmuneta@upm.es

Universidad Politécnica de Madrid

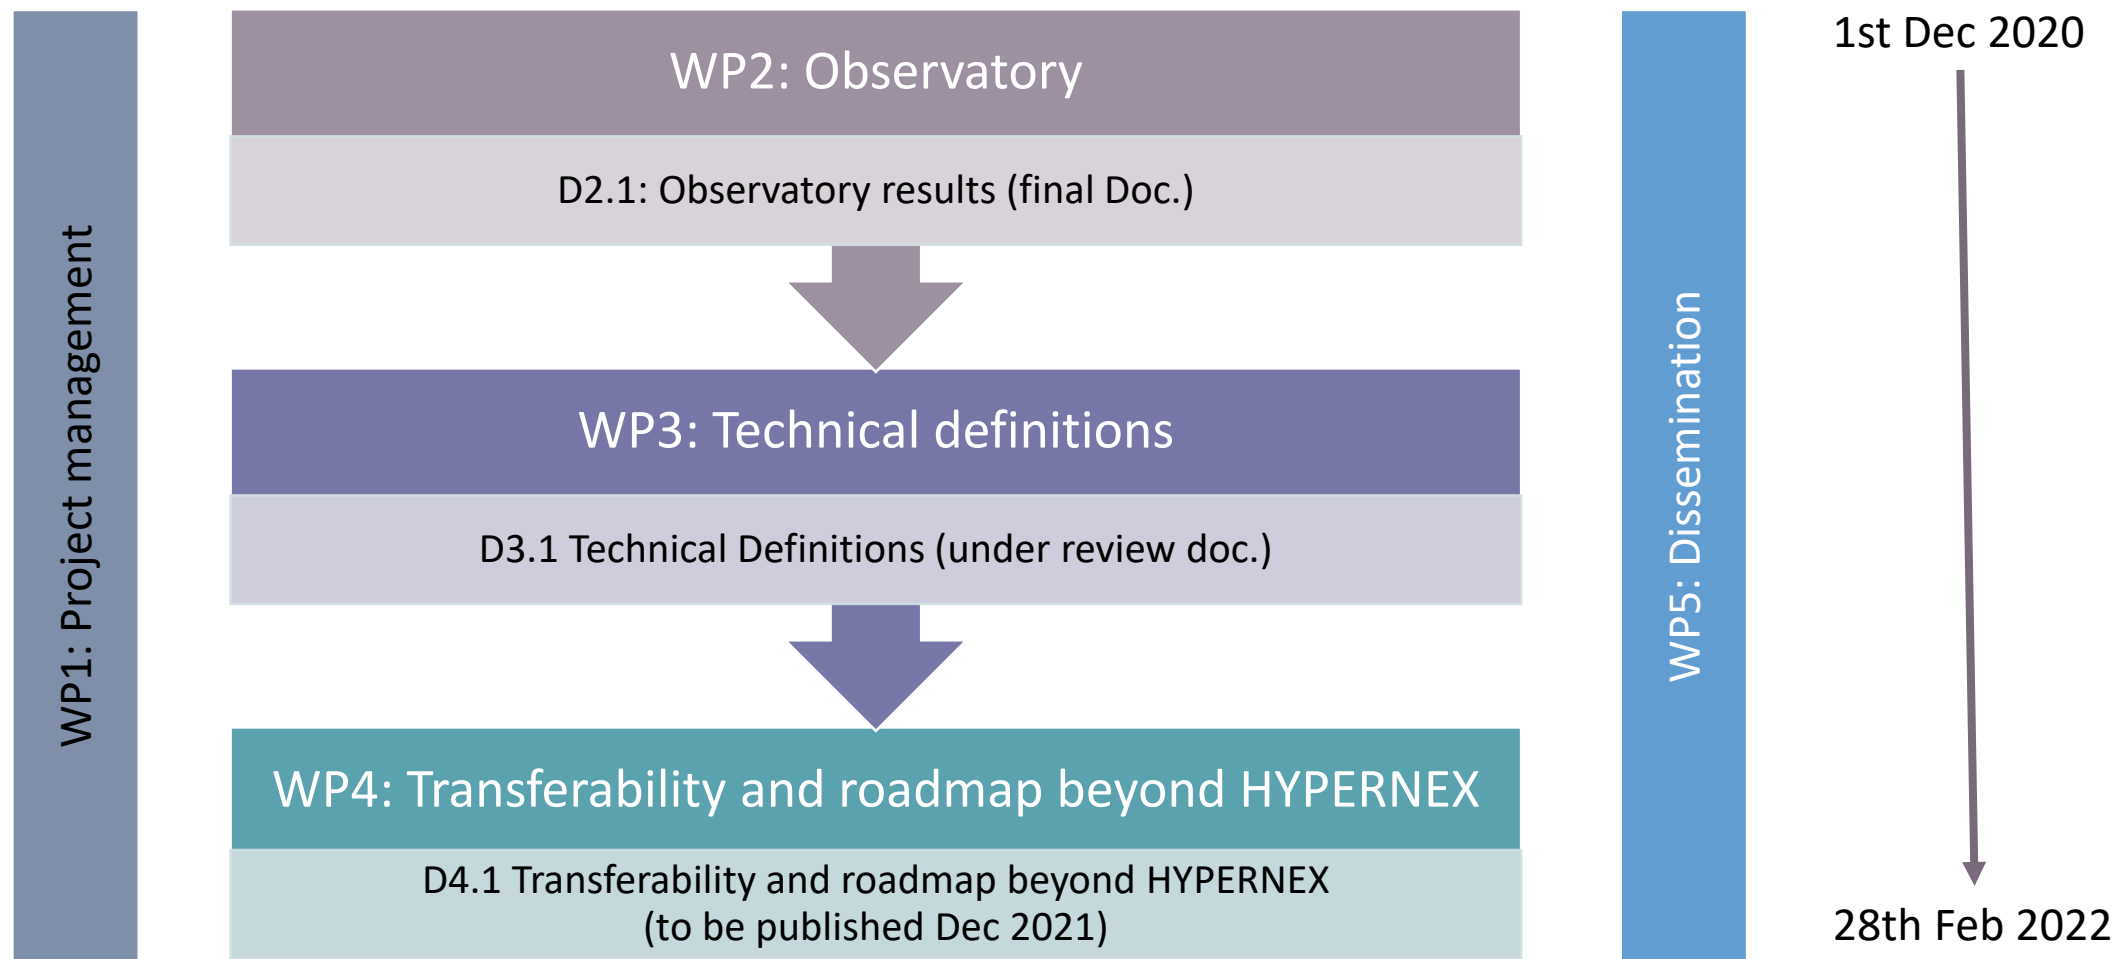

HYPERNEX

Collaboration of four
promoters,
universities,
research centers
and
railways
organizations

Goals

- HYPERNEX addresses to accelerate the hyperloop development, an energy efficient solution based on direct zero emission, in Europe
- HYPERNEX will boost the hyperloop market industry in Europe and helps to have a better understanding on how they can provide value to enhance hyperloop technical development
- HYPERNEX will create a common framework among the different stakeholders to boost its development

Documents and results

We will publish the document and results in this page. Please keep watching.

D2.1 OBSERVATORY

D2.1 OBSERVATORY RESULTS (Final)

On May 10, 2021, this document is under review by the S2R committee.

On October 2021, 26 this document has been published as final version.

D3.1 Technical Definitions (Final)

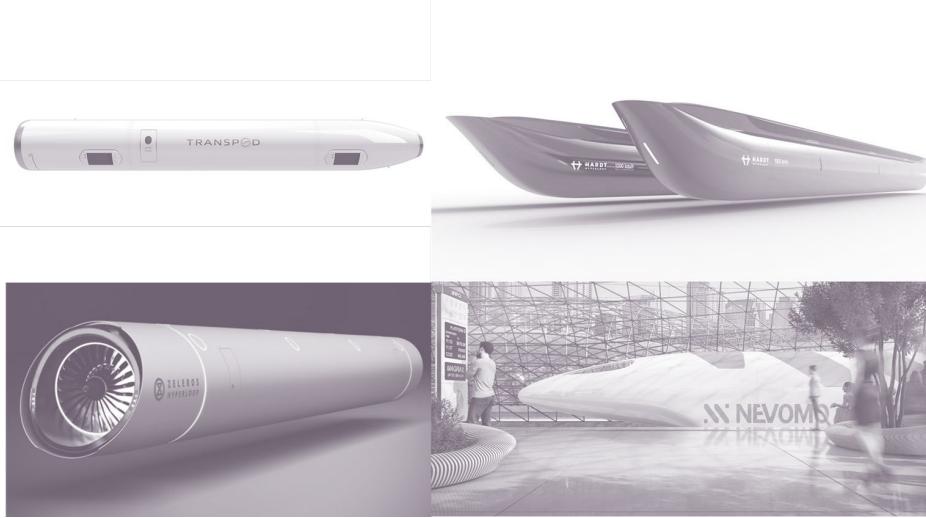

On October, 27 2021, this document is under review by the S2R committee.

On February 2022, 08 this document has been published as final version

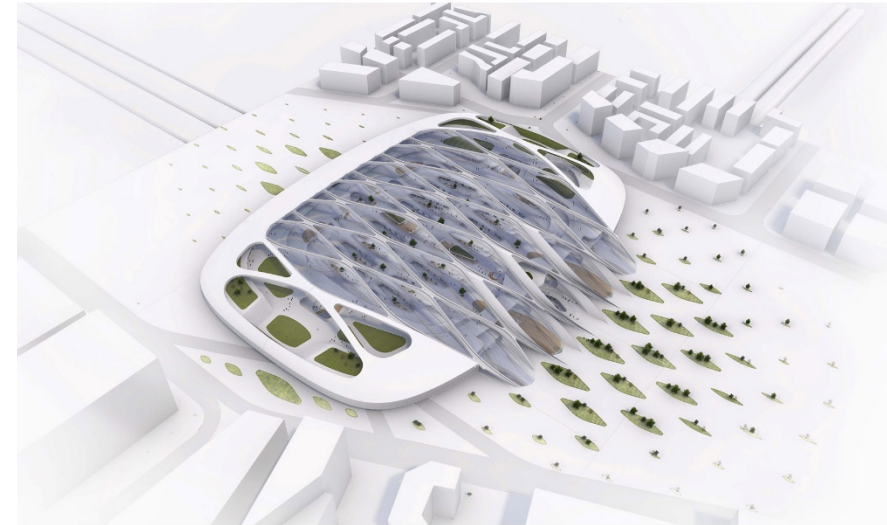

D4.1 Transferability and roadmap beyond HYPERNEX (Draft)

On January, 28, 2022, this document is under review by the S2R committee.

What we have achieved...

- Knowledge about Hyperloop
- Establish a common framework
- Time to work together
- Deliverables gathering all the knowledge

Whats's next...

- Evacuation
- Security
- Virtual coupling
- Interoperability
- Operation...
